CONSULTATION, SUPPORT AND SERVICES FROM A TRUSTED RESOURCE

Make Lachman Consultants' Data Integrity services an essential part of your organization's operations. Working closely with your company and cooperatively with Lachman Consultants' other practice groups, our team of dedicated experts and specialists efficiently and effectively ensure that your data is complete, accurate, trustworthy, and reliable. All Lachman Consultants' Data Integrity services incorporate the highest levels of quality and risk management systems, including adherence to sound scientific principles and good documentation practices.

Lachman Consultants Performs High Quality Data Integrity Risk Assessments Including:

- Qualifying instrumentation
- Validating software applications as configured
- Verification of custom fields and calculations
- Data gathering, processing, and security
- Data and records security auditing and accountability

Lachman Consultants' Approach to Data Integrity:

- Generating Data Flow Diagrams for each system, and identifying areas within the operations that affect the integrity of data (e.g., Auditing)
- Evaluating "ALCOA+" risk at each stage (Attributable, Legible, Contemporaneous, Original, Accurate, Complete, Consistent, Enduring and Available)
- Identifying Risks-to-Data-Integrity to be mitigated
- Providing interim CAPA as required
- Periodically re-assessing data sets and configurations
